### At the museum

Ram and Shyam are brothers. One day they go to a museum. It is the Museum of Musical Instruments. They see many musical instruments such as guitars, pianos, drums, tablas, sitars, keyboards, etc. They like all the instruments especially the guitar and tabla. When they return home they ask their parents to buy them a guitar and a tabla from the market. They want to become musicians.

Their parents buy them a guitar and a tabla set. Ram and Shyam play their instruments at home. Unfortunately, they do not really know how to play them and can only make noises. After listening to the terrible noise for some time, their parents decided to send them to guitar and tabla classes at the Museum's school of music.
